THIS IS NOT A LOCAL TRUGGLE

Cop City will change the idea of police action in the entire country. The proposed compound will be twice the size of the NYPD training camp, and triple the size of the LAPD one. If Cop City is built, we can be sure those facilities will expand as well. This is a local issue affecting only some south Atlanta residents. It is a paradigmatic struggle over the nature of control and repression in our city. It is taking place within a city, within a neighborhood, within a forest. But it is also taking place within a supply chain, a financial system, an industrial arrangement comprised of entities, of facilities, of offices, of persons -- they are everywhere.

Do not wait for an invitation. Form local resistance committees. Take action. Where they conduct business, where they make decisions, where they go on vacation, where they play golf -- confront them wherever they are organizing. Every day that passes, the police are hurting and killing people, meanwhile, the forest burns.

Learn more about the bold resistance movement that aims to prevent the destruction of an urban forest at the hands of local police and film industry executives.
